

OPTIQUE

Velino.0

Engineered to deliver exceptional visual comfort, advanced optics, and a universal mounting ecosystem in a remarkably slim form factor. The patent-pending Velino.0 features a sleek 1/2 in. light aperture, bringing high-end performance to any space while virtually disappearing into the architecture.

*Ultra-low UGR<12 performance using Optique's DN (Dark Optic Narrow) at 700 lm/ft, 3500K, CRI 95+

Experience the Next Generation of Lighting

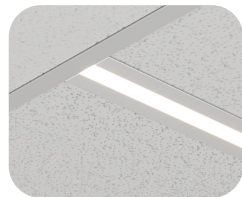

As the slimmest, low UGR architectural luminaire on the market, the Velino.0 family is engineered for total design freedom, seamless integration, and advanced optics.

Ultra-Slim Architectural Form

Focused on essentials, Velino's patent-pending design features a sleek 1/2-inch light aperture, delivering an elegant, minimal profile ideal for high-end architectural spaces.

Exceptional Light Quality & Efficiency

Delivers outstanding color quality without sacrificing performance, with high-output CRI 95+ illumination, high TM-30 scores, and leading-class efficacy.

Comprehensive LED Portfolio

Offered with a full spectrum of LED options, including 2200K-5000K Static White, RGBW, RGBTW, and Tunable White when paired with our diffuser or lens. Perfect for dynamic environments, human-centric lighting, color-impact applications, and everything in between.

Breakthrough Form-Factor Performance

- One of the highest-output fixtures available in a profile this small.
- The slimmest, low UGR architectural luminaire on the market

Robust Control Options

Wide variety of compatible controls and dimmers, including DALI, DMX, and Casambi for seamless integration

Velino.0

*One System. Endless Applications.
Predictable Performance.*

Dark Optics *The Future of Glare-Free Illumination*

Dark Optics bring an elevated lighting experience to Velino.0. Designed to conceal the light source and dramatically reduce brightness, these optics are perfect for glare-sensitive spaces, premium environments, and applications requiring directional control.

Velino.0 T-Grid Clip-On
Lay-In - Linear Optics

T-Grid Clip-On

A surface-mount linear lighting solution engineered for seamless integration with 9/16" and 15/16" Lay-In and Tegular T-Grid ceiling systems. Designed to align precisely with the grid beam, Velino.0 T-Grid Clip-On offers multiple optical options—including linear, dark, and asymmetric optics—along with flexible lengths, finishes, and advanced control compatibility for a refined, adaptable solution in modern interior environments.

T-Grid Recessed

A discreet recessed linear lighting solution designed for seamless integration into T-Grid ceiling panels. Recessed directly into the tile for compatibility with any grid size or profile, Velino.0 T-Grid Recessed offers flexible optical options and refined finishes while preserving a clean, uninterrupted ceiling plane.

Velino.0 T-Grid Recessed luminaires provide a versatile alternative to traditional troffers in T-Grid ceilings. For standard lighting needs, Two Velino.0 T-Grid Recessed luminaires offer an output comparable to a typical troffer, while three can effectively replace a high-output troffer. While multiple luminaires can be placed together in one ceiling tile to meet a specification, their discreet and nimble nature allows them to be spread across many tiles, resulting in greater design flexibility and optimized light distribution.

Slat

Velino.0 Slat is a slim linear lighting family engineered for seamless integration within slat walls and ceilings. Available in 1/2" and 5/8" profiles to accommodate 1/2", 3/4", and wider slat gaps, it delivers refined illumination that enhances material depth. With linear, dark, and asymmetric optical options—along with flexible lengths, finishes, and advanced control compatibility—Velino.0 Slat provides a clean, unobtrusive lighting solution for contemporary interiors.

Air Solo

Velino.0 Air Solo is a suspended linear lighting family designed for architectural spaces requiring high-performance direct illumination. Featuring refined optics and discreet power-over suspension options, Air Solo creates a floating presence while delivering glare-controlled light. With linear, dark, and asymmetric optical options, flexible finishes, and advanced control compatibility, Air Solo offers a refined solution for modern interior environments.

Air Duo

Velino.0 Air Duo is a suspended linear lighting family engineered to deliver balanced direct and indirect illumination for visually comfortable architectural environments. Uniform downlight is paired with high-performance uplight to enhance both task visibility and ambient brightness. With refined optics, discreet power-over suspension options, and flexible configurations—including linear, dark, and asymmetric optics—Air Duo offers a floating solution for modern interior spaces.

Surface

Velino.0 Surface is a compact surface-mount linear lighting family designed for clean installation on drywall, millwork, shelving, and architectural surfaces. Featuring linear, dark, and asymmetric optics, it delivers smooth, uniform illumination with excellent visual comfort. With flexible lengths, refined finishes, and optional integrated wire raceway, Velino.0 Surface offers a streamlined solution for task, display, and general architectural lighting applications.

Recessed

Velino.0 Recessed is a compact linear lighting family designed for clean, architectural integration into ceilings and walls. Available in trimless mud-in and flanged configurations and options for 1/2 in. and 5/8 in. thick drywall, it delivers smooth, uniform illumination while maintaining an ultra-minimal visual footprint. With linear, dark, and asymmetric optical options, flexible lengths, and advanced control compatibility, Velino.0 Recessed offers a refined solution for modern, detail-driven interior environments.
